

## IN THE SPECIFICATION

Please replace paragraph [0028] with

Therefore, the present invention provides a water dispersible polyisocyanate composition bearing urea, preferably a water dispersible polyisocyanate composition bearing urea and urea derivatives, more preferably a water dispersible polyisocyanate composition bearing urea and biuret, and a water dispersible polyisocyanate composition bearing biuret, which are characterized by being prepared through heating ~~heating~~ the above water dispersible polyisocyanate composition bearing urea for conducting a subsequent reaction so as to increase the numbers of the isocyanate functional groups contained in the composition.
